

Telesphere Launches SIP Trunking with BusinessSphere Connect Service

*--BusinessSphere Connect Enables Companies with Existing PBX
to Harness Cutting-Edge Telecommunications Technology--*

Phoenix, AZ (December 18, 2007) – National telecommunications provider Telesphere recently augmented its BusinessSphere Connect product line. This fully-integrated and dynamic voice and data solution is designed to work seamlessly with any premises-based phone system, and now supports SIP trunking.

While Telesphere already offers a robust business trunking product that will integrate with an existing traditional PBX system; BusinessSphere Connect offers customers and businesses the latest in VoIP trunking (SIP), which will interface directly with IP PBXs and bring the latest advances in features and functionality.

“There is a monumental shift taking place to migrate to IP based phone systems. Telesphere wants to continue to be in a leading position to offer the most efficient and powerful solution for customers with these new-generation products,” said Telesphere Chief Executive Officer Clark Peterson. “The addition of SIP trunking was created with these companies in mind, and will help them get more out of their current IP PBX’s and receive the benefits of industry leading VoIP technology.”

BusinessSphere Connect is available to all companies regardless of size. Aligning with Telesphere’s technology and service allows all businesses to use state-of-the-art services that until recently were only available to large corporations. Telesphere also provides a complete portfolio of fully-hosted PBX services that can integrate with existing PBX systems.

Telesphere bundles include an integrated router, standard line features, and higher dynamic Internet speeds than traditional integrated products. Additional solutions including Remote Office, Virtual Office and robust Call Center applications can now be integrated. Other available features include simultaneous ring, web click-to-dial integration with Microsoft Outlook and Internet Explorer, and voicemail-to-email.

Telesphere provides a suite of fully-hosted voice and data services that address business telephone systems, or PBX, voice and data solutions and wide area networking, Internet, business continuity/disaster recovery capabilities as a single voice and Internet service provider, all at an affordable monthly price.

About Telesphere

Telesphere is a Phoenix-based managed services provider that delivers an innovative package of IP telephone service and internet access to businesses throughout the United States. Telesphere’s services allow small- to medium-sized businesses to enjoy the latest voice and data features of large businesses without the costly investment of on premise equipment; as well as providing the most advanced

business trunking to those with existing PBX phone systems. Telesphere fully manages its customers' services over a private IP facilities-based network. It allows Telesphere customers, spread across multiple offices throughout the country, from small business, medium business, and even home business, to function seamlessly as if they were in the same location. 1 (888) MYSHERE and www.Telesphere.com
